● Capital Chatter

THE AFTERMATH OF THE CUBAN affair is likely to bring about large changes in the once-secret Central Intelligence Agency. Far too much publicity has been focussed upon it and to a certain extent its effectiveness — if any — has been impaired. At all events, watch for the intelligence and operational functions to be separated with the latter going into a new and highly secret organization — highly secret, that is, until its members and others start talking about it. The Cuban fiasco has also made very unsteady the perch of CIA director, Allen W. Dulles.
